

# The Carbon Chronicle

VOLUME 35: No. 20

ACME, ALBERTA, THURSDAY

JUNE 21st, 1956

\$1.50 a Year; 5¢ a Copy

John Harsch is sure rushing the season. We understand he has ripe tomatoes home grown on his front porch.

Mr. Fred Larson of Anchorage, Alaska was visiting at the home of his brother Pete. They had not seen one another for 39 years. It was a grand reunion for both brothers.

Mr. and Mrs. E. Bettcher and baby left Monday for Morris, Manitoba. They were accompanied by their mother, Mrs. C. C. Perman who will spend the summer at the home of her daughter and son-in-law, Mr. and Mrs. Hoffman of Morris, Manitoba.

## "GIVE CREDIT WHERE CREDIT IS DUE"

The campaign for "Cancer Fund" was not undertaken by local organizations or Service Clubs, and this very important drive has been carried out solely by a very busy lady in the person of Mrs. Margaret Fox. Your efforts merit public appreciation, Mrs. Fox.

## FISH & GAME NEWS

A trap shoot was held June 21st. The following scores were made:

Wray Wright.....	22
I. W. McCracken.....	20
Dusty Poxon.....	19
Arthur Hoivik.....	17
Wayne Garrett.....	13
Les Bramley.....	17

Don't forget the trophy shoot on June 28th at 7:00 p.m. sharp.

Authorized as Second Class Mail by the Postal Department at Ottawa

MEMBER OF THE C.W.N.A. Subscription—\$1.50 yr. Canada Foreign Countries \$2.50 a year

BORN—To Mr. and Mrs. Alex Ziegler, a son on Monday June 11 in the Drumheller hospital, weight 8 lbs.

Mrs. Holmes and Lorraine spent last weekend at the home of Mr. and Mrs. Braisher at Ghost River Dam.

Birthday greetings are extended to another of our old time citizens, Chas. Graham who celebrated his 79th birthday June 14th.

Shirley Hay has just returned from Edmonton. As you know, Shirley was selected to go to Edmonton to attend the Farm Club Week sponsored by the Alberta Wheat Pool. Congratulations, Shirley.

Mr. Jim Cooper, who is at present employed at Banff spent a few days at his home.

Mrs. Hein of Calgary is visiting at the homes of her brothers Fred, John and Chris Harsch.

Mr. and Mrs. A. J. McLeod left Wed. for Calgary to attend the wedding of Mrs. McLeod's sister.

Mr. John Reid Sr. returned to Vancouver on Friday after having spent the last two months at the home of Mr. and Mrs. John Reid Jr.

Mrs. Wm. Reid spent a couple of days this week at the home of her son-in-law and daughter, Mr. and Mrs. Joe Heffernan of Calgary.

## ELNORA COMMUNITY AUCTION SALE

Following is just part of a list of items to be sold by Auction in Elnora. All commission goes to the Boy Scouts. Come on out and bring along the Machinery, Livestock or Lumber, Posts, etc. you wish to sell. Help yourself by helping the citizens of tomorrow.

**WED., JUNE 27th, 1956**

SALE AT 11 A.M.

LUNCH AT NOON.

### MACHINERY—

Model D John Deere Tractor on good rubber. 101 Massey-Harris Super Twin Tractor. 8 ft. Cockshutt Tiller. 6 ft. Cockshutt Tiller with Seed Box and Fertilizer Attachment. ## PONY LEAGUE BASEBALL

Due to the final exams, our ball boys decided to play an advance game with Acme on Friday the 22nd. The Carbon Legionnaires romped around the diamond for 19 runs while Acme were less fortunate with seven trips around the square. "Al" Dechenne tossed some warm balls to Wilbert Harsch for the first three innings then the chunky artist Smoky Vienes chucked to "Stonewall" Ohlhauser. Big Art Dechenne came in to pinch hit for Archie Ohlhauser and slapped a Mickey Mantle drive out of the park. The Carbon boys were lucky they had that old hickory bending the right way because they booted the horsehide around a little too much.

Carbon has won six out of seven games, so folks come out and see them go against Ghost Pine July 2nd at 6:30 sharp.

A very well attended ball game was witnessed at Swalwell. There was a number of good plays and some very close plays

at home plate. Old faithful Gore did a nice job and tagged a lot of the Carbon boys coming home. L. Boese was the big stick for Swalwell with two doubles. Pee Wee Johnson and Ron Fox collected three for four for Carbon. The loud noise for Carbon came off the hickory of "Stonewall" Ohlhauser who connected for a triple and a homer. He came in to pinch hit for W. Harsch who did a nice job of handling old "Smoky" Vienes who received thirteen strikeouts. The final outcome was 18 to 2 in favor of Carbon Legionnaires. By the way, folks, these two clubs are fighting it out for first place.

## CARBON LITTLE LEAGUE

Carbon Little League held firm in first place by defeating Acme 7—3, thus taking the 6th game of their 12 game schedule.

"Duke" Diederich played a snappy shortstop and kept the game on ice by coming through on several occasions with brilliant

## Much more research needed trace causes heart ailments

"Diseases of the heart alone are responsible for one-third of all deaths in Canada," states Dr. Carl Burton, of the Ontario Heart Foundation and the University of Toronto, in an article written specially for the current issue of Health Magazine, official publication of the Health League of Canada.

### Zangero, cracker stacker, pretzel skinner . . . ?

If Spring gives you the wanderlust and your job palls, you might get some help from the United States labor department's new Dictionary of Occupational Titles. It lists some 60,000 jobs over the country, a lot of them new and different, at least to us.

You can guess, perhaps, what a "cracker stacker" does. But how about a zangero? He's an irrigation ditch supervisor. Or a stick man? He chases away people who get too near to welders working on the heavily charged third rails of subways. A pretzel skinner doesn't use a vegetable parer in his work—he just stacks pretzels on conveyor belts.

There are a lot of jobs, that sound intriguing and are self-explanatory. Such as a doll's eye setter, a bologna lacer and a hat ager (who ages hats for Hollywood costume departments).

Then there's the chamberman—and don't confuse him with chambermaid. His trade is concerned with manufacturing sulphuric acid. The job title that really intrigues us, though, is the wrinkle chaser. He works in a shoe factory, not a beauty parlor. Doesn't that beat everything since the plumbing specialist with the left handed monkey wrench?

### Meets brother for first time in 43 years

Hyman Schwartz, 66, of Montreal, met his brother in Milwaukee recently—for the first time since they were separated in Russia 43 years ago.

And he has a chance meeting on a Florida vacation last year to thank for the re-union.

Schwartz was sunning himself on a beach when he fell into casual conversation with another holiday-maker, Ben Schnoll, of Milwaukee.

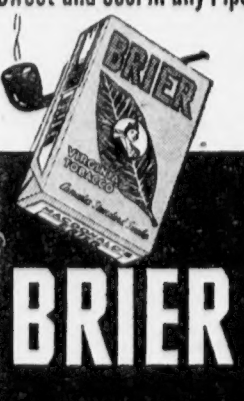

Schnoll mentioned his in-laws, by the name of Pearlman, and Schwartz said, that used to be his name, until he changed it a few years ago.

Schnoll asked a few more questions, and when he got back to Milwaukee checked up with his brother-in-law, Max Pearlman, 58. To his delight he found that the two men were brothers.

A visit was arranged, and Schwartz set off for Milwaukee, to be met by his long-lost brother—and by a happy Schnoll, still nodding his head in disbelief at the reunion he had brought about by a million-to-one chance.

"Radioactivity" is nothing unique to the Atomic Age. Our neighbor has a radio that's been active day and night for years and years.

Sweet and cool in any Pipe

**BRIER**

CANADA'S  
STANDARD PIPE TOBACCO

Cardiovascular diseases kill approximately three times as many people as cancer, six times as many as accidents, and seven times as many as pneumonia and influenza.

"It is estimated that there are 500,000 persons throughout Canada at present with disease of the heart or blood vessels in some form or another," says Dr. Burton. "The huge economic loss to the country becomes apparent in terms of loss of life, absenteeism, disability with resultant loss of gainful employment, and cost of care and treatment."

#### Great need for funds

The great need for funds to conduct research and to attract and keep our best men in these fruitful lines of work became apparent to the section of cardiology of the Ontario Medical Association in 1948, from which a committee on cardiology was formed under the chairmanship of Dr. John Keith. The efforts of this committee resulted in the incorporation of the Ontario Heart Foundation in 1952.

Since its inception the Ontario Heart Foundation has had a close liaison with the purely professional Canadian Heart Association, and members of the latter from elsewhere in Canada are organizing similar heart foundations in British Columbia, the Prairie provinces and Quebec, and it is hoped that the Atlantic provinces may follow suit.

At a recent meeting in Ottawa of cardiologists from across Canada called by the minister of National Health and Welfare, a resolution was passed to establish a Canadian Heart Foundation to coordinate the efforts of the Provincial Heart Foundations in carrying out their objectives.

"We are looking forward to a great future as we attempt to discover the various causes of cardiovascular diseases and thus lead to improved methods of prevention and treatment. In spite of a belated start, we, of the Ontario Heart Foundation, are confident of the ultimate success of a countrywide effort to conquer the nation's leading killer," Dr. Burton declared.

### Strictly Fresh

Fellow sporting a Van Dyke is trapped in an enclosure surrounded by high walls. How does he get out? Whisks out by a whisker, says the fellow across

the desk from us. (Some days are worse than others when it comes to dreaming up this column).

In the early days of the U.S. Supreme Court, one of its members was a bit too fond of the bottle, and even imbibed while he was sitting on the bench. The great Chief Justice John Marshall despaired of reforming him completely, but did get him to agree to drink only during such sessions as were held in rainy, rheumatism-encouraging weather. However, Marshall caught him in chambers taking a swig shortly thereafter on a warm spring day when there was not a single cloud in the sky.

But the offending justice was ready with a defence. "The Supreme Court," he announced grandly, "has jurisdiction, as I see it, over the entire United States. And somewhere in this country at this very time it's raining to beat Hades. I have therefore kept my promise to you faithfully."

### HOME WORKSHOP

#### Mottos, trivets for the home jig-saw fan

by Alice Brooks

Build your own wooden lawn or patio chairs easy to do — saves many dollars besides!

Woolcraft Pattern 7385: Simple direction for making lawn, porch or patio chairs. Actual-size paper pattern pieces included, with easy-to-follow number guide.

To obtain this pattern send twenty-five cents in coins (stamps cannot be accepted) to:

Household Arts Department,  
Department P.P.L.,

60 Front Street W., Toronto.

Two FREE patterns — printed in the new Alice Brooks Needlecraft book for 1956! Stunning designs for yourself, for your home — just for you, our readers! Dozens of other designs to order—all easy, fascinating hand-work! Send 25c for your copy of this wonderful book right away!

## The Pattern Shop

### Fashions

#### Half-size ensemble

by Anne Adams

Perfect twosome for summer — sundress with pretty yoke detail, and cover-up bolero! Perfect for the shorter, fuller figure — its graceful lines make you look inches taller, sizes slimmer! Proportioned to fit — no alterations!

Pattern 4606: Half sizes 14½, 16½, 18½, 20½, 22½, 24½. Size 16½ requires 3½ yards 35 inch fabric; bolero, 1½ yards.

This pattern easy to use, simple to sew, is tested for fit. Has complete illustrated instructions.

Send thirty-five cents (35c) in coins (stamps cannot be accepted) for this pattern. Write plainly Name, Address and Style Number and send orders to:

Anne Adams Pattern Dept.,  
Department P.P.L.,

60 Front Street W., Toronto.

Be sure to write plainly your Name, Address and Pattern Number.

### EASY TO MAKE

#### Your own lawn or patio chairs at low cost

Trivets are in wide use as wall decorations as well as the traditional use of protecting the dining table from hot dishes. There are five designs on one large pattern, including a platter size trivet. The two wall mottos illustrated are also on the pattern in actual size. With this pattern

there is no laborious tracing of the saw lines. You just lay the pattern on the wood that is to be jig-sawed, go over it with a warm iron and the complete design is transferred to the wood. This pattern can be used on both new wood and painted surfaces. To get a copy of this large "IRON-ON" pattern No. 108 send 75c with name and address.

FREE CATALOGUE on request.

Address order to:

Home Workshop Patterns,  
Department P.P.L.,  
4433 West 5th Avenue,  
Vancouver, B.C.

### Blind gardener gets good results

By R. V. RUDOLPH,  
Field Secretary, C.N.I.B.

Mr. C. E. Baldwin, of 120 Magrath Street, Yorkton, Saskatchewan, a retired salesman who was forced to give up his employment because glaucoma robbed him of his sight, is very far from surrendering all his activities. He is an ardent gardener, and his skill in this pursuit is attested by the fine vegetables which his garden produces each year. He thoroughly enjoys this type of work.

Mr. Baldwin uses a short-handled hoe, and gets down on his knees between the rows. Feeling ahead of him with one hand, and identifying plants by touch, he hoes with the other.

He chops his own fire-wood, and does much of the household tinkering which is required to keep his home the neat, attractive dwelling it is. When not busy in his garden, or with his tools, Mr. Baldwin reads extensively, using the Talking Book service provided by the Canadian National Institute for the Blind Library. With these recorded books, he keeps himself well informed, and can discuss many current best sellers with his sighted friends.

Mr. Baldwin is indeed a living example of the spirit which the C.N.I.B. endeavors to bring out in those visually-handicapped people who seek its assistance and support in regaining a happy, active normal place in society.

Most men who smoke cigarets at all smoke less than a pack a day.

These days most people work under pressure, worry more, sleep less. This strain on body and brain makes physical fitness easier to lose—harder to regain. Today's tense living, lowered resistance, overwork, worry—any of these may affect normal kidney action. When kidneys get out of order, excess acids and wastes remain in the system. Then backache, disturbed rest, that "tired-out" heavy-headed feeling often follow. That's the time to take Dodd's Kidney Pills. Dodd's stimulate the kidneys to normal action. Then you feel better—sleep better—work better. Ask for Dodd's Kidney Pills at any drug counter.

### Stuttering said personality defect rather than defect of speech

Stuttering is a personality defect rather than a speech defect, and treatment must be aimed at the underlying emotional difficulties, according to a release from the American Medical Association received by the Health League of Canada.

#### Hundred tons at one bite

The world's biggest power shovel, 16 storeys high and capable of gulping nearly 100 tons of earth at one bite, has been put in operation? This is the gee-whizziest piece of machinery we've heard about recently.

It is said that the shovel "could lift a platform containing 166 automobiles 100 feet in the air, swing them the distance of a football field, set them down on top of a 10-storey building, and swing back for another load—in 45 seconds. That seems like kind of a useless procedure, because what would you do with 166 automobiles on top of a 10-storey building? But it's an impressive picture.

Just the same, the shovel we have in mind these days is a little hand-operated model hanging out in the garage. Soon we're going to use it to spade up a plot for vegetables in the backyard. It won't handle 100 tons in one bite of course. But that's all right; there aren't 100 tons of dirt in our vegetable plot, anyway.—Minneapolis Tribune.

#### FIRST HAND GUN

The Swiss perfected the first one-man hand gun late in the 15th century. It weighed 15 to 50 pounds depending on how much wood was used.

8197

## Booklet lists major wrongs of comic books

A 16-page booklet, "What's Wrong with Comic Books?", recently published by the Alberta Government, has been prepared as a guide to parents who wish to provide their children with reading material that is both interesting and educational.

Compiled by the Advisory Board on Objectionable Publications, the booklet deals with comic books that are detrimental and carried descriptions of how they influence the behavior of children.

The advisory board, appointed by the Alberta Government to investigate the various types of "Comics", studied the influence of these publications and made recommendations on alternative types of beneficial reading material.

The board is under the chairmanship of Mrs. A. J. Maure of Edmonton.

The major objections to comics listed by the board are:

1. Some comics glorify crime and criminals. They encourage the commission of crime and contempt for lawful authority.
2. Some comics present a distorted, unhealthy and immoral concept of sex and marriage.
3. Some comics foster prejudice against class, race, creed and nationality.
4. Some comics portray violent death, grotesque, fantastic and unnatural creatures with repulsive realism.
5. Most comics are inartistic.
6. All comics are detrimental to good reading skill.

A rating scale contained in the booklet is intended for the use of parents who wish to evaluate the type of literature their children are reading. In addition the names of a variety of inexpensive books are listed for parents who wish to improve the reading standards of their children.

A section entitled "Guiding Your Child to Good Reading", deals with the types of reading material that have a beneficial effect and advises parents on how to select literature that will provide guidance, education and entertainment for their children.

## TRY AND STOP ME!

By BENNETT O'LEARY

A race-track devotee of many years' standing was astonished to note that two dear little old ladies picked the winner unfailingly in seven straight races—some of them fantastic long shots. Finally he whispered to them, "Divulge your system to me, ladies, and I'll show you how to pyramid your bets so you'll make a million."

"There's really no trick to it," chuckled one of the little ladies happily. "We just bet on the longest tails."

Comedian George Allen tells how a lawyer-friend accomplished the acquittal of a notorious moonshine salesman some years ago. The lawyer pointed dramatically at his bleary-eyed, crimson-beaked client and boomed, "Look at him, gentlemen of the jury. Can any one of you possibly believe that if this fellow ever got his hands on a bottle of hard likker he'd SELL it?" The jury voted acquittal without leaving the box.

A stingy codger, accused of worrying only about his personal affairs during both World War Two and Korea, cited in defence these notable contributions to the national welfare:

He reduced the use of his sun lamp from five minutes to three—to conserve electricity.

He stopped pulling his hand-painted cravats into hard knots—to conserve silk.

He used the same deck of cards for six games of gin rummy—instead of five.

He no longer escorted girls home in taxicabs, but let them go alone in the subway—to conserve gas and rubber.

He gave a whole pint of blood (his chauffeur's) to the blood bank.

3197

## Blacksmith Still Finds Horses

The blacksmith, hero of Longfellow's immortal poem, no longer spends as much time 'neath the spreading chestnut tree as he does peering into the complicated interior of a disabled farm tractor. Today he is quite often a combination smith, forged-iron artisan and mechanic. Typical of the few remaining members of his trade is

56-year-old Harper Rennick, who has tended his forge in the rural community of Shawville, P.Q., since 1917. He still has a small following who call on his horse-shoeing skills, but, in line with this age of speed, the bulk of his work is to keep sleek pacers and trotters well-shod for the race-tracks of county fairs.

Rennick hammers heated horseshoe into shape on anvil in his shop. Farmers often send him cardboard patterns of horses' hooves; Rennick then tailor-makes sets of shoes and travels around community to shoe animals on the spot. During peak spring and fall periods, Rennick shoes as many as four horses daily.

Rennick clinches shoe on horse's hoof using rasp file. As well as being blacksmith, farm implements dealer and tractor repairman, Rennick also has raced trotters at district fairs. Bulk of his work in the forge is in shoeing trotters, but occasionally he is called upon to repair iron-bound carriage wheels.

In 1920 Canada boasted about 3,500,000 horses, performing heavy, useful work on farms, cattle ranches and in cities. But in the years since, with the development of heavy trucks and efficient farm machinery, auto-makers have more and more forced horses from the road and put them under the hood of today's sleek automobiles.

Today, Canada's horse population has shrunk to about 900,000 animals, and it's dwindling every day. With the exception of a few dray horses still doing daily battle with big-city traffic, Canada's supply of *equus caballus* is now pretty much relegated to doing minor farm and ranch chores not yet touched by mechanization.

**FATAL JUMP**—Leo Valentin, French aerialist, who died trying to glide from plane at 9,000 feet, demonstrates his birdlike flying gear before an earlier leap. Valentin's technique was to leap from his plane, open his wings which he manipulated with his arms, and glide for several thousand feet before opening his chute. He was blown against the side of the plane in the recent fatal jump.

**COUTURIER DESIGNED**—Smartly original this brown suit designed by Marie France of Montreal has a huge collar high around the throat and a novel back panel on the jacket.

**EIGHTY-FOUR-YEAR-OLD BRIDE**—George Shaw, 72, plants a big kiss on the cheek of his 84-year-old bride after their wedding in Vancouver, B.C. He had been courting Mrs. Alice Salmon for a year. Both had been married before.

**REUNITED WITH SON**—Mrs. Anina Hamilton embraces her son Maurice as she is reunited with him in Wayne County Jail, near Detroit. Mrs. Hamilton and her husband made the 10,000-mile trip from their native Baghdad to be with their son when he goes on trial for the slaying of a Detroit grocer. Maurice was a student at the time of the slaying and had been in the United States only a few months.

**WHAT LEISURE?** Fred Dwyer, holder of the American record for the 2,000-meter track event, models leisure-time outfit for male members of the United States Olympic team competing at Melbourne, Australia, this year. It features Bermuda shorts in gray flannel, knee-length wool hose, white short-sleeved sports shirt, white wool sweater with Olympic colors at neckline. Garb was modeled in New York City.

**VISITING CANADA**—Maj.-Gen. J. P. E. Bernatchez, left, general officer commanding Quebec Command, greets Field Marshal Viscount Montgomery at Montreal, where the distinguished soldier arrived from Britain to begin a three-week informal visit to Canada.

**FRIENDLY PEEK**—Skyline of lower Manhattan as seen through a submarine's periscope provides spine-chilling food for thought: What if it were being seen by an enemy submarine commander? The camera took this friendly peek at New York City from control room of the nation's first atomic submarine, USS Nautilus, as she visited New York harbor for the first time. Deadliest sub in the world was surfaced at time picture was taken.

**POGONOTOMIST**—Eve Neil, 24, beards the men on a personal problem heretofore considered purely in the male domain. She's a "pogonotomist"—an expert on the subject of chopping off whiskers. Employed by a razor manufacturer, she does a tidy business in giving lectures before groups whose members have long since ceased being little shavers.

**YOU CAN'T BEAT 'EM**—So you might as well join 'em when the ladies get the urge to houseclean. If you've ever thought of departing for the Orient come spring cleaning time—don't. Luckless wretch, at left, is pressed into service on his day off to lug floor mats out of doors so that the lady of the house can beat them. Scene is set in Tokyo, dismal drama is universal.

### CREDIT RESTRAINT TO CONTROL INFLATION SAYS BANKERS' PRESIDENT

Montebello, Quebec, June 22—The present policy of credit restraint, applied by the chartered banks as a result of the monetary actions and suggestions of the Bank of Canada, was designed "to sustain and prolong prosperity by not allowing an inflationary spree to take over", it was stated here today by F. W. Nicks, president of The Canadian Bankers' Association.

Speaking at the Association's annual meeting, Mr. Nicks said the pressure for additional credit during the past 12 months has been unusually strong—so much so there had been increasing restraint applied by the Bank of Canada.

"This means", said Mr. Nicks, "loans have become less easy to obtain, increases have become difficult to arrange and, for some purposes, quite out of the question."

"It may seem strange to talk of credit restrictions while there is abundant evidence of continuing prosperity for the country at large", he said. "But we are living in an age of national economic management, not only in Canada but in all leading nations, and one of the prime objectives of such management is to see that booms do not get out of hand and lay the groundwork for depressions."

Mr. Nicks said the Bank of Canada, in regulating credit and currency, generally used monetary powers to increase or diminish the chartered banks' aggregate capacity to supply credit in the form of loans or investments. In addition, sometimes the central bank sought informal arrangements with the chartered banks to deal with special situations. During the past year, there has been extensive use of both methods.

"If", he added, "the special arrangements which have been made in the past year have helped, along with more orthodox measures, to moderate a too rapid expansion of credit, this is of course all to the good. Experience is showing that it takes a good deal of determination and rather strong medicine to bring a surging business expansion under reasonably effective control. The credit restrictions no doubt are a burden on many businesses and individuals which would like to have greater access to lending facilities. It is unpleasant to be told by one's banker that there is simply not enough money to go 'round. The banker, too, finds it unpleasant and difficult to have to

## A Forest Fire Can Be More Destructive Than An ATOMIC BOMB

a little lighted match—one glowing cigarette stub—one little camp fire, carelessly handled can trigger a raging forest fire more destructive than an atomic bomb.

### HELP KEEP ALBERTA GREEN

It takes nature years to make a tree. Yet man, in a split-second of carelessness, can start a fire that will completely destroy it. Help protect this rich natural resource—our forests—by observing these rules.

- ★ USE CAR ASHTRAYS TO DISPOSE OF CIGARETTES AND CIGAR STUBS.
- ★ THOROUGHLY DRENCH CAMP FIRES WITH WATER OR COVER WITH EARTH.

Published in the interests of Alberta's Welfare . . . by

## Carbon

Continued from front page fielding plays.

"Chewy" Wood and "Hook Arm" Esau caught their bunt signals and scored runners from third in both cases.

"Chicky" Charlebois got his share of strikeouts as he worked the six innings on the mound. "Strong Arm" Downe wastes no time retrieving the ball and hurling it into the infield.

We appreciate the interest of the fans and will make an effort to show you top notch baseball.

Frances Bushby left for Calgary on Tuesday where she plans to attend Henderson's business school.

Mr. and Mrs. Wm. Wood are spending 10 days at their farm home east of Carbon.

Don't forget the I.O.D.E. Rose Ball June 29th in the Scout Hall.

Don't forget the community meeting on June 28th at 8 p.m. Please plan to attend and join in the discussion on our new hall.

Mr. and Mrs. Cave accompanied by Mrs. Levins and Mrs. Cadman were Calgary visitors this week, Mrs. Levins having gone on to Victoria and Vancouver for ten days.

Mrs. Bushby, Mrs. Wm. Hammel and Mrs. Dick Poole were also Calgary visitors.

Three of our younger citizens of town celebrated their 7th birthdays, Sharon Kranzler, Robin Hunt on Thurs. 21st and Larry Poxon on Saturday the 23rd.

### CARD OF THANKS

I wish to thank the Gamble Community Club for flowers sent while I was in the Three Hills hospital.

Murray McCracken.

## Level Land

Alma Will and Stella Bahlwan both of Walla Walla, Wash. were visiting in the district with friends over the weekend.

Mr. and Mrs. Sam Leiske, Larry and Wayne were at Lacombe and taking part in the Graduation Exercises, also Mr. and Mrs. Jacob Gimbel.

Mr. and Mrs. Martin Bechthold and family of Strathmore were visitors at the home of Mr. and Mrs. Theo Bechthold the past weekend.

On May 31 a wedding shower took place in the S.D.A. Hall for Mr. and Mrs. Howard Gimbel now of Loma Linda, Calif. where he is taking his Medical course. Howard got married to Miss Judy Carl daughter of Mr. and Mrs. Carl of Portland, Oregon on May 27, the night after he graduated from Walla Walla College. A good program was given here in the hall. Pastor Goertzen was in charge of the program.

A good lunch was served and

all present had a good time.

Eddie Human is visiting in this district with his cousins and friends for a few days. Mr. Human is the auditor for the S.D.A. Conference in U.S.A. and was an old pioneer of the Level Land district for many years.

Donavon Huether and Bill Roach, K.C. of Walla Walla paid a visit to this district and with Don's parents over the weekend.

Mr. and Mrs. Alex Zapras of Yorkton, Sask. were visiting in the district and at the home of Mr. and Mrs. Roy Schaber.

Miss Dolphia Ladner of Madison College, Tennessee was a visitor in the district with her aunts and uncles, the Huethers. Also Beth Blaisdell of Madison College, both on their way home to Kelowna, B.C.

Mr. and Mrs. Emmanuel Nether and daughter Delores were visiting with son Lawrence and the Frank Schmaltz family in Sparwood, B.C. on the weekend of June 10 and they report they are all fine.

Bob Huether returned home a week ago from Madison College, Tenn. where he attended school, and left for Kelowna for a short visit.

Albert Reiswig of Whittier, Calif. was in the district for about a week to be with his father, Mr. C. K. Reiswig. He arrived one hour before his mother died. Also his sister, Mrs. Alberta Burtis and Mrs. Elmer Reiswig both of Seattle.

Mrs. Maria Reiswig of Beiseker died Monday, June 11 at the age of 78. She was born in Kansas and came from Minnesota 42 years ago. Was a member of the S.D.A. Church in the Level Land district.

# Meet the people Behind the POWER

## THE POWER PLANT OPERATOR!

Before a peak demand arises, the Plant Operator has extra generators "on the line". No power shortage is felt, because he anticipates these changes and ensures you of the steady supply of power that you expect. The co-ordination of all the complex problems of an electric power plant is the service he renders to you.

## How to reach your limits of endurance

Research shows that the average athlete has two limits to his endurance: 1. His mental limit, when he thinks he is tired and must decrease his efforts; 2. His physical limit, when his body actually reaches impairment and cannot continue effort.

Generally speaking, the average athlete drives himself no farther than his mental limit. The trouble with this is that his mind generally underestimates the abilities of the body; it tells the athlete his muscles are too tired to continue long before they actually reach such a state.

The athlete who learns that it is no more necessary to discontinue hard effort when the first fatigue symptoms are felt than it is to go to bed when the first symptoms of sleepiness are felt will learn a tremendously helpful lesson. Great runners like John Landy, Chris Chataway, Sandor Iharos and the rest have had to learn to disregard the feelings of fatigue that make them want to stop and run through their mental limit toward their physical limit. By doing this in training, as well as in their races, they have become world champions.

### Lead with the hip

Here's a hint from Ted Williams, one of baseball's greatest hitters. Ted says that it's important that the batter learn to lead his swing with his rear hip.

To do this, the lead foot must be pointed straight at the pitcher as you step forward. The swing should then be started by whipping that rear hip around fast so that when you finish the swing your hips are square to the pitcher.

Learning to use this hip action

## WEEKLY BIBLE COMMENT

### LORD'S PRAYER IS MODEL OF PERFECTION

Prayer and thanksgiving are linked together in Christian life. We cannot be truly thankful except in the spirit of prayer; otherwise our thankfulness may be concerned only with self. Nor can we be prayerful except in the spirit of thanksgiving, for our approach to God is unreal and inadequate unless back of it is what Paul expressed in his cry, "Thanks be to God for His unspeakable gift."

All this is expressed in the Lord's prayer, in the manner in which all prayer should be made.

Let us note a few things concerning this manner. First, the prayer begins with God and with reverence toward Him. The first petition is that of God's kingdom come and the second is that His will may be done in earth as it is in heaven.

It is only upon this high plane that the Christian comes to pray for his own needs, and the Christian's prayer is not for wealth or abundance but for daily bread.

The next petition links the Christian both with his fellow men and with God; as he prays for forgiveness of his own trespasses he asks only that he may be forgiven as he forgives others.

The prayer for deliverance from evil is an expansion of the prayer for forgiveness. And the Lord's prayer ends as it begins, with adoration to God and contemplation of His goodness.

Paul admonished the early Christians to pray without ceasing. It is easy to pray without ceasing this sort of prayer, for it is not only expressed in words but in the constant aspiration of the devout soul.

When you're folding or ironing your youngster's clothes, put a hanky or cleaning tissue right in the pocket. You'll never be confronted with a runny-nosed child without a hanky.

3197

properly will be a big advantage, because it will help you get your whole body behind the swing rather than just the arms.

Another hint from Ted that will help your swing is to keep your shoulders loose. Tight, tense shoulders will create a jerky, uncoordinated swing. You should be loose and easy to swing hard and accurately.

The Canadian Amateur Sports and Physical Fitness Development Service is a nationwide project operated by Sports College to improve standards of sports and physical fitness. This newspaper is pleased to participate in this service by presenting "The Sports Clinic" to its readers in the best interests of this community. Further information about how CASPFDS can help you may be obtained from Sports College, Box 99, Toronto 1, Ont.

## Quick Canadian Quiz

- Which has the greater value, furs taken from wild-life trapping or pelts produced by Canadian fur farms?
- In 1951 net farm income in Canada reached the record high of \$2,108 million. What was the 1955 total?
- What river system of the prairies is exceptional in that it flows east to Hudson Bay rather than north to the Arctic Ocean?
- How many Canadians carry voluntary hospital insurance? Surgical insurance? Medical insurance?
- What is meant by the term "government transfer payments?"

### ANSWERS TO QUICK QUIZ

- Money collected by taxation and then paid out to the public in the form of family allowances, old age pensions, welfare payments, etc.
- The Nelson River system.
- In 1955 wild-life trapping produced 57 percent of furs.
- Voluntary hospital insurance, 6 million; surgical insurance, 5 million; medical insurance, 4 million.
- \$1,421 million.

### PEGGY

—By Chuck Thursday

### THE TILLERS

—By Les Carroll

### Coffee break

The worker who waits anxiously for the coffee break in the morning would do well to conduct a little research into his or her own breakfast habits. If the usual breakfast consists of a snatched cup of coffee with or without a scrap of toast, that is the explanation of the early morning slump that requires coffee. A good breakfast—citrus fruit juice, wholegrain cereal, egg or bacon, toast and hot beverage—will have surprisingly good results; after all, no one can

feel at his best with a lapse of anywhere from 12 to 16 hours between yesterday's last meal and today's lunch.

### DRINKING WATER AT SEA

Some American merchant and naval vessels have machinery to turn sea water into fresh water. Each machine turns out from 20,000 to 40,000 gallons of drinking water a day.

Light from the sun reaches the earth in about eight minutes.

## Ten Word INTELLIGRAM

Check the correct word:

- Report on the President's most recent physical checkup was (favorable) (unfavorable).
- Dodgers' Carl Erskine recently hurled the (1st) (2nd) no-hitter of his career.
- Soviets reportedly are considering (increasing) (abolishing) concentration camps.
- Recent Saar elections indicate (increased) (decreased) desire for reunification with Germany.
- Majority of homes in the nation are supplied with (alternating) (direct) current by power companies.
- Actor Montgomery Clift was (killed) (injured) in an auto accident recently.
- Atom sub Nautilus has been operational for (less) (more) than a year.
- She has (seldom) (never) been refueled.
- She'll have (6) (16) sister subs eventually, under present plans.
- Next big labor negotiations will be in (steel) (coal) industry.

Count 10 for each correct choice. A score of 0-20 is poor; 30-60, average; 70-80, superior; 90-100, very superior.

### Decoded Intelligram

1—Favorable, 2—2nd, 3—Abolishing, 4—Increased, 5—Alternating, 6—Injured, 7—More, 8—Never, 9—16, 10—Steel.

## Delay second Salk dose not injurious

REGINA.—Even one dose of Salk vaccine will give some protection against paralytic poliomyelitis declares Dr. George Kinneard, acting deputy minister of public health.

"That is why we are giving children the available vaccine on a one-dose basis until additional supplies reach us. Any delay between first and second doses will in no way impair the additional protection of the second dose when it becomes available," Doctor Kinneard said.

"The protection of even one dose of vaccine greatly over-shadows the possible hazard associated with giving the vaccine during the so-called 'polio season,'" Dr. Kinneard continued. Although some persons already exposed may come down with polio shortly after receiving the vaccine there is no evidence that giving the vaccine during the incubation period of polio increases the seriousness of the disease.

"No vaccine is 100 percent effective and there is always a lag between the date of injection and the development of immunization. The patient needs time to manufacture his own anti-bodies.

"Last year nearly 860,000 Canadian children received Salk vaccine. In the main each child received two doses, spaced four weeks apart.

"In each Canadian province a team of trained observers was established to watch over the Salk vaccine program. We wanted to investigate any reactions to receiving the vaccine and we wanted to know whether or not it was of any value in preventing poliomyelitis.

"These investigations revealed that Salk vaccine was safe. Only three cases of polio were reported in children within four weeks of vaccination. A thorough investigation of these three cases showed that there was only one case amongst the 860,000 where there might possibly have been a relationship between vaccination and the disease. Hence we can say with confidence: Salk vaccine is safe.

"In the second place all the information we have to date indicates that there was a reduction in the incidence of paralysis in vaccinated children when compared with a like group of unvaccinated children. Hence we can say: Salk vaccine has protective value."

## Date announced for angling championship

Manitoba's third annual Provincial Angling Championship will be held June 10, MPAC chairman R. T. "Bill" Robinson, Neepawa, has announced.

The event, sponsored by the Fish and Game Associations of Neepawa and Portage la Prairie, will again be held in the Whitemud River in the vicinity of Westbourne, according to Mr. Robinson.

Top prize of a boat and outboard motor will be open to any fisherman entered in the competition. The provincial trophy, however, will go to the Manitoba angler taking the largest fish. Main species found in the Whitemud-Lake Winnipeg area are northern pike and pickerel.

This year's championship will be restricted to 1,000 entries. Entry forms are now available from the Manitoba Provincial Angling Championship, Box 800, Neepawa.

### MADE-TO-MEASURE

Kitchen equipment should be installed to suit the proportions of the woman who will use it regularly. A tall woman who has to bend over low tubs, tables or sink may suffer fatigue, while it can be equally uncomfortable for the shorter person who has to reach or to stand on raised boards.

cesses of royal blood, and archbishops of Canterbury and York and the lord chancellor.

3197

PRINCESS ANNE GIVES A WAVE AND A SMILE—Princess Anne waves to the crowd which gathered to watch the Queen and Prince Charles drive from Buckingham Palace to Euston Station. They were going by Royal train to spend Whitsun at Balmoral, where they were later joined by the Duke of Edinburgh.

## Anhydrous ammonia fertilizer exceedingly dangerous to humans if mishandled

REGINA.—Labor minister C. C. Williams issued a plea for safety regarding the use of a liquid fertilizer which made its debut into Saskatchewan only last year.

"The fertilizer, anhydrous ammonia, is exceedingly dangerous to human beings if mishandled, and therefore much care is needed because of its physiological effects," he said. "Users must remember that ammonia is not poison gas, but due to its high solubility in water, it does have a very irritating action on the mucous membrane of the eyes, nose, throat and lungs."

Anhydrous ammonia is a compound formed by the combination of two gaseous elements, nitrogen and hydrogen, in the proportion of one part nitrogen to three parts of hydrogen by volume.

Since anhydrous ammonia's sharp pungent odor serves as a warning signal, very small concentrations of ammonia in air are readily detected. Prolonged exposure to air containing 100 parts per million of ammonia is not harmful, but breathing air containing heavier concentrations may cause sudden death from spasm or inflammation of the larynx.

Mr. Williams said all employees handling anhydrous ammonia should be impressed with the potential danger which it represents and should be trained in its safe handling. Persons having chronic lung diseases or those who have shown evidence of hypersensitivity to ammonia should not be employed where they will be exposed to it.

Storage tanks, when installed for bulk distribution, must have a clearance area of 50 feet from the side of any storage tank to the line of any adjoining property which is or may be built upon.

Because of its hazardous nature, anhydrous ammonia vessels cannot be placed any closer than 400 feet from any school, church, hospital or other place of public assembly.

Mr. Williams said any person who has been burned or overcome by ammonia should be placed under a physician's care immediately. Prior to the physician's arrival, the patient should be removed to an area free from fumes, preferably a warm room of about 70 degrees Fahrenheit, and placed in

a reclining position with head and shoulders slightly elevated. The patient should be kept warm. For immediate first aid any part of the skin affected should be flooded repeatedly with water which should always be available wherever anhydrous ammonia is handled.

Regulations governing the use of anhydrous ammonia and providing for the safe design of storage and other type vessels employed in its use have been passed by order-in-council and are available upon application to the Boiler and Pressure Inspection branch of the department of Labor.

## Attendance Sask. Museum in first year more than 200,000

REGINA. — To the more than 270 persons who toured the Saskatchewan Museum of Natural History in Regina May 16 it was just another date, but to the staff it marked a very important occasion.

For Fred G. Bard and Dr. Robert W. Nero, director and assistant director respectively, the important occasion marked the first anniversary of the museum which has had more than 200,000 visitors touring its colorful and educational galleries since its opening.

It was on May 16, 1955, that His Excellency, The Right Honorable Vincent Massey, Governor General of Canada, officially opened the building as a monument to the

pioneers of Saskatchewan.

Since that momentous event, when His Excellency unveiled a 20-foot high legend carved in relief on the blue Tyndall stone next to the main entrance, the museum has attracted a total of 200,666 visitors to its two floors of displays.

On May 16, 1955, attendance at the museum was 2,500 while the same day one year later, attendance was only 272. The 200,666 visitors in the first year included 225 groups of which 153 were from schools and 76 were composed of adults.

The largest attendance date was Sunday, June 26, 1955, when 4,808 persons toured the galleries. This mark was almost matched on two other Sundays, June 5 and June 12, when visitors totalled 4,556 and 4,216 respectively. The three largest attendance months were July, June and August, in that order, when visitors totalled 37,471; 31,397 and 29,014 respectively.

Of the 225 groups touring the museum, eight were from the United States and totalled 204 visitors. They were from Medicine Lake and Opheim, both in Montana; Idaho State College and the following North Dakota places; Columbia, Carpio, Kenmare, Stanley and Bowbells.

Attendance by months since the official opening of the museum included: May 16-31, 1955, 16,265; June 31, 397; July 37,471; August 29,014; September 12,847; October 12,474; November 3,892; December 2,997; January, 1956, 7,703; February 8,655; March 13,240; April 16,855 and May 1-16, 8,856.

Mr. Bard said that mid-day August 17 the attendance passed the 100,000 mark, and that May, 1956, saw the countstretch pass the 200,000 mark.

## :: GEMS OF THOUGHT ::

Obstacles are those frightful things you see when you take your eyes off the goal.

—Hannah More

Consult thy everyday life; take its answer as to thy aims, motives, fondest purposes, and this oracle of years will put to flight all care for the world's soft flattery or its frown.

—Mary Baker Eddy

When a man has not a good reason for doing a thing, he has one good reason for letting it alone.

—Sir Walter Scott

Nothing is impossible. We merely don't know yet how to do it.

—Thomas A. Edison

The secret of success is constancy in purpose.

—Benjamin Disraeli

A Quaker gun is a dummy gun mounted to deceive the enemy.

## Canadian statistics report

(A Weekly Review)

**Industrial Production:** Canada's industrial production, as measured by the Bureau's index, was 10 percent larger in March this year than last, averaged 8.6 percent higher in the first quarter. Manufacturing was up nearly 9 percent in the month, over 7 percent in the quarter; mineral production showed gains of 22.5 percent and 20 percent; electricity and gas output had increases under 2 percent. In manufacturing, non-durables had a somewhat larger gain than durables in March, durables a somewhat larger gain in the quarter.

**Manufacturing:** Estimated dollar value of manufacturers' shipments in March was over 7 percent larger than in February, 9.5 percent larger than in March last year. Cumulative value for the first quarter was over 11 percent above last year. Dollar value of new orders in March was slightly less than for February but over 9 percent greater than a year ago.

**Merchandising:** Department store sales continued to climb in the week ending May 12. Detailed report on March sales show an estimated first-quarter gain of \$25,000,000 over last year with March business accounting for nearly half the increase. All but three of 29 specified departments showed advances in March.

Retail trade as a whole had an estimated sales gain of over 9 percent in this year's first quarter, with March sales slimbing 14 percent due largely to Easter trade. The quarter's advance was shared by all main classifications of business. Wholesale sales had estimated sales increases of 24 percent in March, nearly 16 percent in the first three months.

**Agriculture:** Exceptionally rapid progress was made with spring seeding in the Prairie Provinces during the week preceding May 23 under nearly ideal weather conditions. Weather conditions have been adverse in Ontario, Quebec and the Maritime Provinces and work on the land is generally far behind normal. In British Columbia, however, the season is earlier. Farm land values generally increased last year over 1954.

**Labor:** Total employment rose from mid-March to mid-April, bringing the estimated number of persons with jobs at April 21 to 5,326,000, an increase of 203,000 over a year earlier, and the number without jobs and seeking work to 257,000, down 70,000 from last year's April number.

**Transportation:** Railway carloadings were nearly 11 percent larger in the first week of May than last year; from the first of January were up a larger 12.5 percent. Railway freight traffic summary for 1955 shows tonnage moved was over 15 percent greater than in 1954. Freight volume moved through Canadian canals last year showed a closely similar proportionate increase of nearly 16 percent.

### EPILEPSY

A common disease that affects one in every two hundred people can, in many cases, be controlled so that the patient can live a normal life. Those who witness a seizure are often at a loss to know how to help the sufferer. The most necessary action is to place between his teeth some object which will prevent his biting his lips or tongue. A pencil wrapped in a clean handkerchief is suitable; no object small enough to be swallowed should be used. Unless he is in a dangerous or wet spot, it is better to let him lie flat on the floor or ground until he regains consciousness.

Mercury is the smallest planet in our solar system.

## OUR COMPLETE SHORT STORY —

## radio queen

—By WILLIS LINDQUIST

IT WAS a bright moon in Sheridan Park and as usual the fat little man was feeding pigeons by the fountain. Alex found the sight reassuring. Out of habit he sat down on the shaded bench, which Tally had called "our bench." She had chosen it herself because she liked to be near the fountain and the birds and exchange pleasantries with the pigeon man.

The pigeon man suddenly discovered him. He tipped his bowler in that funny way and came waddling over, paddling the air with his arms. He was Tally's friend and Alex managed a polite smile.

"Well, now!" beamed the old man. "It's good to see you after all these weeks, young man." His eyes sharpened on the suitcase. "Going away?"

"Chicago," Alex said grimly. He didn't bother to add that he was going to look for a job. Not that he needed a job. Chicago was a strange place where he could forget. The trip would take most of the money he had saved for the time when he and Tally would get married.

The pigeon man joined him on the bench. "You broke off with that nice little girl, didn't you?"

"Something like that," Alex stared at the pigeons that were gathering about them. He knew suddenly why he had come to the park. There were memories here. He could feel close to Tally, talk with someone who had known and liked her.

"Doesn't seem right," the pigeon man sighed. "Never a cross word between you, except those first few days when she brought her lunch. You wouldn't have it."

Even that seemed a pleasant memory now. There was so little to get excited about, and he had made so much of it.

"We were both working in a stockroom then," Alex explained. "She wanted to save money by bringing our lunch. I had to make her understand that — well, you know how cheap it would look to some of the others."

The pigeon man nodded. There was a flutter of wings in the sun and he took a cracker from a bag. He munched on it thoughtfully. "That was many months ago," he said, hanging a jumbo-sized question mark in the air.

"Yes," Alex remarked dryly. "She struck it pretty sweet on the radio, singing. That did something to her. She's changed. You wouldn't know her."

"Indeed?" the Pigeon man cleared his throat. "As a member of the bar, I've learned to judge people. Your Tally seemed very genuine to me."

Alex was tempted to ask what bar. The pigeon man frequently posed as a doctor before the mothers of infants, and as a retired circus performer for the benefit of small boys.

"She was always so—so sweet and honest, so much like a small kid," Alex said. He licked his dry lips. "That's all gone now. She seems to have nothing to say to me. We've got nothing in common. She's living in another world where all our plans must look pretty silly to her. She's got too

much money. That's what it is."

"Giving you the brush-off, eh?" Alex scowled. "She looks plenty smart in her new clothes and she knows it. I tried everything; flowers, the best shows, dinners. None of it means a thing. I'm still just a guy working in a stockroom at forty a week."

The pigeon man fanned himself with his bowler. "So now you're going away."

"I'll start over again. At Wharton's they think I'm going on a vacation. They all think Tally is coming along, that we're going away to get married." He gave an ironic grunt. "What a laugh that is! I hardly see her any more. She's always too busy. Maybe she's stepping out with some big shot. I wouldn't know."

"You told her you were leaving?"

"I did not. I'm through crawling."

The faded eyes studied him. "What if something happened to her voice? She'd be fired. How would it be then?"

Alex's big-knuckled hands clasped and unclasped, and he looked at them as if they were pieces of a puzzle that should fit together — but didn't. "Maybe everything would be the same again."

"My view exactly!" The pigeon man's twinkled. "I think you ought to see her before you leave. She's down in the grotto right now. Goes there every day."

"Tally?" Alex blinked. Then suddenly he was moving. In his haste, he forgot his suitcase. The thought of Tally coming to the park every day was ridiculous. But he had to make sure.

He stared for a long incredulous moment. Tally was there, golden headed and beautiful. She was on the bench near the waterfall. And she eating lunch!

She caught her breath at the sight of him. She seemed suddenly frightened, her eyes fixed upon him with strange intensity. Then the moment passed. Color came into her cheeks and she folded her hands in sudden resignation.

"Well, now you know," she looked down at the water splashing on the rocks. "You never gave me a chance to explain about the radio job. Before I could reach the stockroom you had told everyone. They were all treating me like a radio queen. You were making so much of it. You were so proud I didn't dare say anything."

Alex sank slowly onto the bench. "What was there to tell?" "It's only a small unimportant job. It doesn't pay much money, but it was a start."

"You could have told me later."

She shook her head disconsolately. "I was trying to get-up courage. Then I had to buy new clothes so I wouldn't be so conspicuous. It took all the money I had saved—our money. It—it was like stealing. I hate myself so. I couldn't bear the thought of you spending all that money on me. It got to the point where I couldn't stand the sight of you. I kept hoping they'd soon give me a good singing contract. Then you'd have a right to be proud. I could tell you the truth."

Alex took her in his arms, buried his face in her hair. "With a voice like yours, baby, you can't miss."

He held her close for a long

**FISH STORY**—No one made a birdie but the fish sure were nibbling at the Metropolitan Beach golf course, near Mount Clemens, Mich. Ivan Sayers, left, and James Kraft display fish found in a sand trap near the 11th green after gale-lashed waters of Lake St. Clair swept inland, washing ashore hundreds of carp.

## Obesity study shows prevention should commence with children

Nutritionists with the Agricultural Research Service in Washington have been advised that fat prevention should begin with children.

Dr. Charlotte Young of the New York State (Cornell) Experiment Station, in reporting on a study made of 168 obese patients, says it seems less important in prescribing for a patient to know how long he or she has been fat than to know when the person first started getting that way.

Correction of bad eating habits and the obese outlook on life is called relatively easy with those who gained their unwanted poundage in adulthood and almost impossible with those who became obese as children. Only one-tenth of Dr. Young's patients—all referred to the clinic by physicians and given every conceivable help in the way of diets, counselling and medical supervision—managed to get down to an ideal weight.

## Obese from childhood

A fourth were reasonably successful. Half had some success and enjoyed improved health from the experiment. But the others simply floundered, losing a little this week and gaining it back the next. Most of the difficult ones had been obese from childhood, it was demonstrated.

Dr. Young suggests that meals "like mother used to make" are simply not required any more for the vast majority of more or less sedentary citybred persons and that nutrition education is a matter of increasing urgency.

Meals streamlined in calories, but with adequate mineral and energy content, combined with a regular daily program of physical activity and exercise, seem to be called for with many of today's urban families.

If mother gets fat her youngsters may also, not because they inherit the fat, but because they time, until a tremulous smile came back to her lips. "I should take you to a big dinner for that but I guess we'd just better keep saving."

Her smile broadened as he found an apple in the paper sack. He popped his teeth into it. And the juice ran down his chin.

## Funny and Otherwise

During the filming of a prison story, a group of convicts lined up for a game of football.

"Hey," protested the film-producer, "you have twelve men a side. That's against the rules!"

"Yeah," grinned one of the prisoners, "that's why we're here. We cheat!"

A widower, confronted by the sad task of looking over the belongings of his departed wife, decided that the only thing he would preserve was a hat. It was placed on a shelf and not disturbed until discovery by wife number two, who was told it was preserved in memory of his first wife.

After a time his second choice died. The bereaved man again selected a hat: this was placed beside the first one.

Eventually a third wife was introduced to his household. She, too, was inquisitive when she found the millinery, and asked questions. When the husband explained, she replied.

"That's all right, but the next hat that goes up there on that shelf is going to be a bowler."

"How's business, old man?"

"Picking up a little, I'm glad to say," replied the sales manager of a big jet aircraft company. "As a matter of fact, one of our men came in yesterday with a \$500,000 order for our new 'plane.'"

"I really can't believe that."

"It's true. I can show you the cancellation."

## Delicious!

Serve warm, generously buttered... a delicious tea-time treat. If you bake at home there's never a failure when you use dependable Fleischmann's Active Dry Yeast!

## ALMOND TWISTS

1. Measure into bowl 1 cup lukewarm water. Stir in 2 teaspoons granulated sugar. Sprinkle with contents of 2 envelopes Fleischmann's Active Dry Yeast. Let stand 10 minutes, THEN stir well.
2. Cream 1/2 cup butter or margarine. Blend in 1/2 cup granulated sugar, 1 1/2 teaspoons salt. Blend in, part at a time 2 well-beaten eggs. Add the yeast mixture and 1 teaspoon vanilla. Stir in 2 cups once-sifted all-purpose flour and beat until smooth and elastic. Work in an additional 2 1/4 cups (about) once-sifted all-purpose flour.
3. Turn out on lightly-floured board; knead until smooth and elastic; place in greased bowl. Brush top of dough with melted shortening. Cover. Let rise in warm place, free from draft, until doubled in bulk—about 1 hour.
4. Meantime prepare and combine 3/4 cup finely-crushed cracker crumbs, 1/2 cup blanched almonds, finely-ground, 3/4 cup granulated sugar, 1 slightly-beaten egg, 2 tablespoons water, 1 1/2 teaspoons almond extract.
5. Punch down dough. Turn out and halve the dough; set one portion aside to shape later. Roll one portion into a 12-inch square. Spread 3/4 of square with half the crumb mixture. Fold plain third of dough over crumb mixture, then fold remaining third over top—making 3 layers of dough and 2 of filling. Cut rectangle into 18 strips. Twist each strip twice; place on greased cookie sheet. Press 2 or 3 blanched almonds into filling of each twist. Brush with melted butter or margarine; sprinkle with sugar. Shape second portion of dough in same manner. Cover. Let rise until doubled in bulk—about 1 hour. Bake in moderate oven, 350°, 20 to 25 minutes. Yield: 36 twists.

# Give it an *INCH* and watch it take the *MILES!*

Just a nudge of your toe . . . and there's nothing but pleasure ahead. Now's the time to discover how the frisky new Chevrolet loves to travel.

Drive the new Chevrolet — and get ready to reach for your road maps. There's something about this car that starts you dreaming of those exciting places that always seem to be across the country from where you live.

The fact is, Chevy's got an itch to travel — and it's catching. Nothing serious, you understand. You just want to pack your bags and start putting the miles behind you.

Because Chevrolet covers the miles as only a truly great road car can. That's something you sense instantly in its hill-flattening horsepower, in its solid sureness of control on the tightest curves and

its rock-steadiness on the straight-away.

These are the things that give Chevrolet — and you — an urge to go places. And they make the going sweeter and safer. But there's not the slightest need to take our word for all this; why not discover it for yourself? Your Chevrolet dealer will be happy to show you what a tall traveller this new Chevy is! Is your family all set for the fun?
